

Using Technology For Learning

EGyaan Proposal

Date: 4th Jan, 2016
K. J. Somaiya Polytechnic

About EGyaan

EGyaan is an Innovative Learning + School management product which is all devices (Tablet & Smartphones) ready that's bringing in "digital technology" into the traditional education system by presenting easy to implement complete solution built on open source technology delivered as a service that can be directly accessed through your web-browser, without setting-up any technical infrastructure at your end.

It is an easy to operate, high performance web to education product developed keeping in mind needs of Universities, Colleges, Educational institutes and coaching classes to provide Online education to their students by uploading their syllabus & Textbooks which can be accessed by students using tablets or handheld device ! No need to carry heavy back-packs!

Features

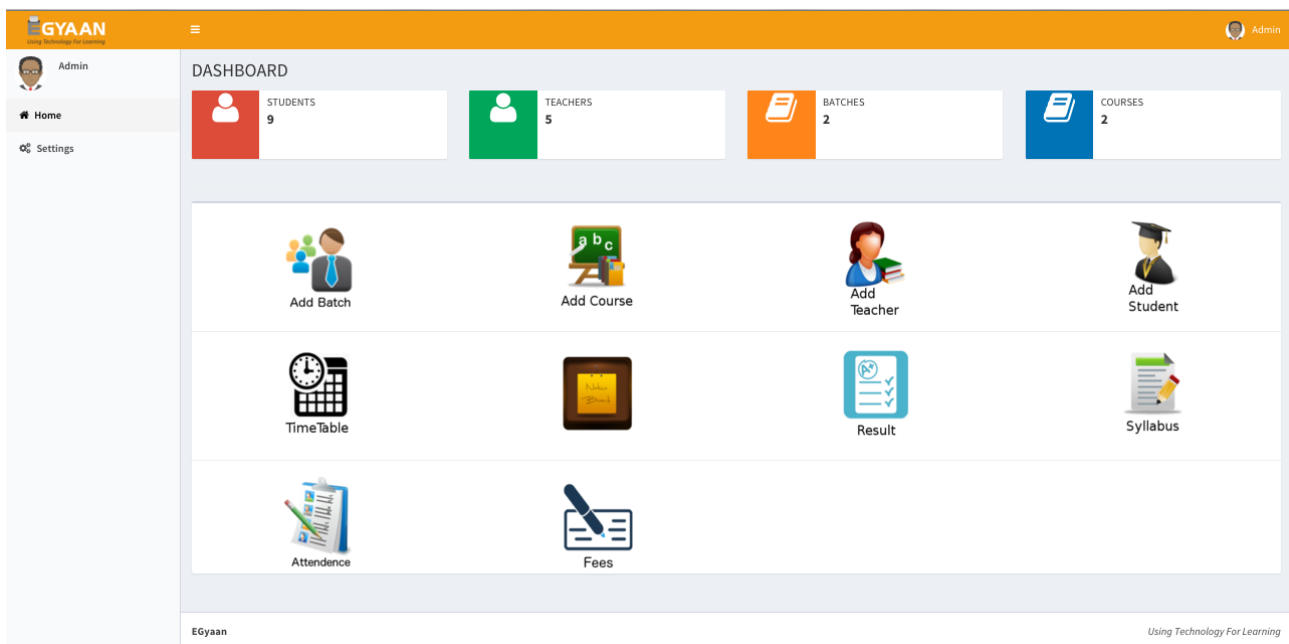

1. No technical expertise require
2. Effortless back office management
3. Flexible enough to suit any education institute in any part of the world!
4. Create Multi Users Accounts like Admin, Teacher and Student for different branches.
5. Uploaded education material can be accessed by student using tablet or even a smartphone
6. Go green by digitizing textbook, notes, assignment and all study material.
