

Respected Sir,

I Badal Kotak, being the Technical Secretary of the Students Council of the college, want to put this point in front of you, of allowing the Students Council to conduct the whole Technical fest RENAISSANCE as the only body to do it.

Reason for this:

- **Lack of committee Coordination:** None of the committees coordinates with each other and the Students Council. This lack of coordination leads to clashing of events, problems in organizing the events on the day of fest, etc.
- **Publicity Problems:** When 1 student from each committee goes for publicity of each college, the members of the committee end up fighting to sell their events in front of the students of the target college and as a result, it has a negative effect on the name of the college in front of the students there.
- **Events are not upto the mark:** The budget that is sanctioned for the Technical fest has to be divided amongst each committee for their individual events, due to this, budget is not enough for them to organize the events, so the compensation is done in terms of the quality of the event which in the end affects the Overall Fest.
- **Lot of fights and misunderstandings:** Every committee look for their betterment and at the end it is six different minds all fighting for their interest, this leads to fights and a lot of arguments.
- **Organizing a meeting for so many committees:** This becomes a pain to gather all the committees as they dont want to cooperate with the Students Council and dont turn up in the meetings, some or the other committee is absent in the meeting, this causes problems in making collective decisions.
- **Unprofessional Work Ethics:** It is just a week before that suddenly work is started to put up their events in the fest ad publicity of the same is started very late. They have to look after just one committee but it becomes very difficult for the Students Council to coordinate with everyone at the last moment and to arrange everything properly. The committees are not at all serious about the technical fest , hence, they tend to take their part of work very lightly, this causes lack of professionalism in the organizing of the fest. As we know to setup a good fest we need common thoughts and a professional approach which comes the best when come one body is doing it.
- **Lot of times goes in coordinating with the committees:** Lot of productive time is wasted in bringing all the committees together which leads to a lot of waste of time which instead can be used in some productive work.
- **Hospitality Issue:** There is no one to take care of the visiting guests, it looks very back on the college end when a visitor is kept unattended.
- **Committees are meant to teach people:** Very few seminars and workshops are organized because the committees are at rest in the whole tenure and wake up just before the fest, so the main purpose of the committees is gone as none of the students are not gaining any kind of knowledge from this committees, this means the actual agenda of the committees is not served at all.
- **Payment and report issues:** After a lot of follow up the committees respond about the payment issues and about the report that each committee has to submit at the end of each tenure.
